PROFESSIONAL SUMMARY

Backend-focused Software Development Engineer (SDE I) who improves system reliability and performance for enterprise communication platforms using Laravel, Node.js, MySQL, Redis, and FreeSWITCH. Strengthens production stability through Linux debugging and Redis caching, and builds dependable REST APIs within high-availability, microservice-based architectures.

TECHNICAL SKILLS

Languages: PHP, JavaScript, SQL

Frameworks & Libraries: Laravel, Node.js, AngularJS, Bootstrap

Databases & Caching: MySQL, Redis

Real-Time Technologies: FreeSWITCH, WebSockets, Lua Scripting

Developer Tools & AI Assistants: Git, GitHub, Linux, Postman, VS Code, Cursor AI, ChatGPT, Grok AI, Antigravity AI, n8n

Core Concepts: REST APIs, Backend Development, Microservices, Scalable Systems, Production Debugging, Real-Time Systems, Performance Optimization

PROFESSIONAL EXPERIENCE

Software Development Engineer I | Agami Tech Pvt. Ltd.

July 2024 – May 2026

- Improved platform reliability for enterprise communication systems by engineering and maintaining backend modules in Laravel, MySQL, and Redis.
- Increased usability and consistency across internal platforms by building scalable web application features and integrating frontend components.
- Reduced downtime and strengthened system stability by diagnosing and resolving production issues on Linux-based live servers.
- Optimized backend performance by implementing Redis caching and real-time data handling strategies.
- Extended real-time communication capabilities by developing VoIP functionalities using FreeSWITCH and Lua scripting.
- Enabled smoother real-time communication workflows by integrating Node.js-based microservices for backend event handling.
- Strengthened overall system reliability by collaborating with cross-functional teams to deploy new features.

Software Development Intern | Agami Tech Pvt. Ltd.

January 2024 – July 2024

- Supported on-time feature delivery by assisting in backend development and maintenance of Laravel-based applications.
- Improved integration stability by debugging API issues and contributing to feature implementation tasks.
- Helped maintain application quality by supporting development teams in testing and resolving application-level issues.
- Built foundational backend skills through hands-on experience with MySQL, Redis, Git, and Linux server environments.

PROJECT HIGHLIGHTS

Intalk.io — Communication and Telephony System

- Enabled scalable VoIP communication by developing backend services using Laravel, Redis, FreeSWITCH, and Node.js.
- Supported scalable communication platforms by building real-time workflows and Redis-based data handling.
- Implemented call routing and telephony event handling using FreeSWITCH and Lua scripting to support live communication features.
- Built REST APIs to connect the telephony backend with internal business tools, enabling smoother cross-team data flow.
- Improved responsiveness of real-time features by leveraging Redis for low-latency data access and caching.
- Streamlined internal business operations by designing and maintaining backend workflow modules.

Escalix — Server Monitoring & Alerting Platform (Freelance)

- Improved infrastructure visibility by building backend APIs and monitoring workflows in GoLang to track CPU, memory, disk usage, and service health.
- Strengthened incident response and operational reliability by integrating real-time alerting and event-handling mechanisms using gRPC and WebSockets.
- Supported reliable platform operations by contributing to Linux server monitoring, backend optimization, and dashboard workflows using GoLang, gRPC, WebSockets, PostgreSQL, and REST APIs.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering

R. N. G. Patel Institute of Technology, Bardoli | 2020 – 2024

Higher Secondary Certificate (HSC)

Sanskar Bharti Vidhyalaya, Surat | 2020

Secondary School Certificate (SSC)

Sanskar Bharti Vidhyalaya, Surat | 2018

LANGUAGES & SOFT SKILLS

Languages: English, Hindi, Gujarati, Marathi

Soft Skills: Problem Solving & Analytical Thinking, Team Collaboration, Adaptability & Continuous Learning, Time Management, Production Issue Troubleshooting
