PROFESSIONAL SUMMARY

Backend-focused Software Engineer with hands-on experience building scalable web and real-time communication systems using Laravel, Node.js, ReactJS, MySQL, Redis, and FreeSWITCH. Skilled in backend development, REST API development, Linux production debugging, Redis caching, and real-time communication workflows. Experienced in resolving critical production issues, optimizing backend performance, and contributing to high-availability systems and microservice-based architectures.

TECHNICAL SKILLS

Languages	PHP, JavaScript, SQL
Frameworks & Libraries	Laravel, Node.js, ReactJS, AngularJS, Bootstrap
Databases & Caching	MySQL, Redis
Real-Time Technologies	FreeSWITCH, WebSockets, Lua Scripting
Developer Tools & AI Assistants	Git, GitHub, Linux, Postman, VS Code, Cursor AI, ChatGPT, Grok AI, Antigravity AI
Core Concepts	REST APIs, Backend Development, Microservices, Scalable Systems, Production Debugging, Real-Time Systems, Performance Optimization

PROFESSIONAL EXPERIENCE

Agami Tech Pvt. Ltd. — Software Development Engineer - I

July 2024 – Present Built and maintained backend modules using Laravel, MySQL, and Redis for enterprise communication systems. Developed scalable web application features and integrated frontend components for internal platforms. Diagnosed and resolved production issues on Linux-based live servers to improve system stability and reduce downtime. Worked with Redis for caching and real-time data handling to optimize backend performance. Developed VoIP-related functionalities using FreeSWITCH and Lua scripting. Integrated Node.js-based microservices for real-time communication workflows and backend event handling. Collaborated with cross-functional teams to deploy new features and improve system reliability.

Agami Tech Pvt. Ltd. — Software Development Intern

January 2024 – July 2024 Assisted in backend development and maintenance of Laravel-based applications. Contributed to debugging, API integration, and feature implementation tasks. Supported development teams in testing and resolving application-level issues. Gained hands-on experience with MySQL, Redis, Git, and Linux server environments.

PROJECT HIGHLIGHTS

Escalix — Server Monitoring & Alerting Platform Worked on a real-time server monitoring platform designed to track CPU, memory, disk usage, service health, and infrastructure performance. Built backend APIs and monitoring workflows using Node.js and Laravel for scalable system monitoring. Integrated real-time alerting and event handling mechanisms to improve incident visibility and operational reliability. Contributed to Linux server monitoring, backend optimizations,

and dashboard-related workflows. Technologies Used: Node.js, Laravel, Redis, MySQL, Linux, REST APIs

Communication & Telephony Systems Contributed to backend development for communication and VoIP systems using Laravel, Redis, FreeSWITCH, and Node.js. Worked on real-time workflows, backend APIs, and Redis-based data handling for scalable communication platforms. Developed and maintained workflow modules for internal business operations and backend services.

EDUCATION

Bachelor of Engineering (Computer Science & Engineering)

R. N. G. Patel Institute of Technology, Bardoli (2020 – 2024)

Higher Secondary Certificate (HSC)

Sanskar Bharti Vidhyalaya, Surat (2020)

Secondary School Certificate (SSC)

Sanskar Bharti Vidhyalaya, Surat (2018)

LANGUAGES

English, Hindi, Gujarati, Marathi

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Team Collaboration
- Adaptability & Continuous Learning
- Time Management
- Production Issue Troubleshooting
